Our Mission: (Speech Pathology)
To provide the highest quality care for veterans with communication and swallowing problems through evidence-based, state-of-the-art, least restrictive means, in agreement with clinical guidelines, medical indications, and veteran’s care preferences.

Available Programs/Services include but are not limited to:

- Instrumental assessment of swallowing—including endoscopy and fluoroscopy
- Instrumental assessment of speech and voice—including acoustic, aerodynamic, stroboscopy
- Interprofessional Education Unit
- Special Populations such as palliative care, head and neck cancer, neurologic disease, polytrauma and spinal cord injury (SCI), acute REHAB (CIIRP), Communication group, view OR surgery, GRECC (geriatric research education)
- Comprehensive language assessment and treatment
- Augmentative Alternative Communication (AAC) assessment, treatment and device procurement
- Cognitive Rehabilitation in interdisciplinary collaboration with other professionals (e.g., Rehab, Neurobehavior, SCI)
- Education of veterans, families, healthcare professionals, students-in-training in aspects of communication, swallowing assessment, care and clinical research, we service veterans at all levels of care

“Go confidently in the direction of your dreams. Live the life you have imagined.”
-- Henry David Thoreau
